Mr. Walter Carolan - 05258-045
Box 1000 - LVC
Leavenworth, Kansas 66048

Dear Mr. Carolan:

This is in response to the June 12, 1991, letter from your attorney, James R. Anderson, to the Environmental Protection Agency (EPA) concerning the inventory of the polychlorinated biphenyl contaminated items (which EPA recovered from various locations) and the final disposition of each item.

Enclosed are the various inventories generated during EPA's Comprehensive Environmental Response, Compensation, and Liability Act removal action. The inventories include all items with the exception of the houseboat. The houseboat was removed from the Buxton property the first week of April 1987, and returned to your former facility. Once the materials were returned to the Holden facility, they were initially under the control of the Bankruptcy Trustee. The Bankruptcy Trustee eventually turned the material over to the group of potentially responsible parties who agreed to clean up your facility.

As for the final disposition of each item, you will need to contact Jene L. Robinson, Chairman, Rose Chemical Steering Committee, Illinois Power Company, 500 S. 27th Street, Decatur, Illinois 62525, phone number (217) 424-6834; or their contractor Clean Sites, Inc., 1199 North Fairfax Street, Alexandria, Virginia 22314, phone number (703) 548-8773, as EPA did not make the final selection or disposal arrangements.

Sincerely,

George Hess

TECHNICAL ASSISTANCE TEAM FOR EMERGENCY RESPONSE REMOVAL AND PREVENTION
EPA CONTRACT 68-01-6669

TO: Ron McCutcheon, EP&R/ENSV October 27, 1986
THRU: Russell B. Krohn, Region VII TATL *RBK* TAT-07-F-01773
FROM: Robert L. Fine, Region VII TATM TDD #07-8610-45
SUBJECT: American Steel Works Immediate Removal PCS #6045

The Region VII Technical Assistance Team assisted EP&R in the sampling and removal of PCB contaminated materials from October 7 through 17, 1986. The items had been removed from American Steel Works, Inc., located at 500 West McKissock in Holden, Missouri, and moved to 2459 Charlotte, Kansas City, Missouri, and five other private properties near Holden following shutdown of the plant. Through a warrant issued in U.S. District Court, the items moved to 2459 Charlotte were sampled and found to be PCB contaminated to unacceptable levels, and were returned to 500 West McKissock in Holden. Likewise, the materials taken to private properties around Holden were also returned to 500 West McKissock. Assisting in the removal activities were Ruben McCullers, EPA/RCRA, ERCS contractors and two of EPA's U.S. Deputy Marshals.

Attached is an inventory detailing the items returned to 500 West McKissock, Holden, Missouri. A copy of this inventory was signed over to Clean Sites, Inc. representative Jerry Hollingsworth on October 27, 1986, after concurring with its contents. Please advise if the TAT can be of any further assistance in this matter.

ROBERT L. FINE

*Inventory of items delivered to 700 West McKissock,
Holden, Missouri. Checked by Clean Sites, Inc. Representative
Jerry Hollingsworth on October 27, 1986.*

INVENTORY OF ITEMS REMOVED FROM 2459 CHARLOTTE, KANSAS CITY, MISSOURI

10-7-86 - On trailer no. 746-TSZ:

yellow forklift (Cleveland Townmotor # 11815
assorted scrap metal and wood
blue large pressure tank (est. 2,000 to 3,000 gal.)
Coke machine (# 7HFO38808) from Vendo
large metal cabinet of clothing lockers
cutting torch cart
heat gas/propane tank
Cincinnati time clock
steel table frame
21 - 4'x4' plywood
approximately 25 aluminum pieces, 3' long
pulleys on tree
approximately 20' 6" I beam and square beam
ramps
control box
misc. scrap metal (on pulley) travis wire
1 bale fiberglass insulation
2 iron saw horses

On trailer no. 745-TSZ:

large angle roll (#13521
machine tool (Schom & Johnson)
Two drums with black power
electric motor (Lewis Allis Co. #2112568)
unidentifiable large piece of equipment with electric motor
assorted scrap iron with 3'x3'x5' wire bin
flanger, Buffalo, N.Y. #1
large steel components, painted light blue
Invincible vacuum cleaner #28K140
Reeves motor with tool

On trailer no. 747-TSZ:

large hydraulic metal shear, NIAGARA, fac. #52509
two Chrysler marine inboard/outboard motors (V-8, 225 hp)
w/manifold/cover
Lincoln Electric welder, 2 Hobart welders (1 missing parts)
Unidentified equipment with 4 cylinder motor (Kohler)
large green shear press (Verson #19693-3010) 90 ton capacity, brake
large blue compressor (Gardner/Denver) 6 cylinder

Miscellaneous:

2 junk 4BSL auto carbs - 1 intake
1 bronze boat prop
1 small vacuum pump Duo Seg 1
1 flourescent light reflector
